

# **Localizing Thunderbird 3**

Simon Paquet  
Mozilla Summit

# What's coming up for TB3

- Release schedule\*

- L10n-relevant changes

- Changes in mail/locales/en-US since TB2:  
<http://tinyurl.com/6ajdhp> (+920/-831) Lines changed
- Lightning-integration
- Move to hg (Mercurial)

\* Subject to change

# Who's driving this

- **Simon Paquet (sipaq) will take over as TB localization release coordinator**
  - Adding locales
  - Handling approvals
  - Support localizers
  - Release communication (string freezes, etc.)
- **Axel Hecht (pike) will still cover all technical aspects**
  - Tool development

# Feedback from localizers

- What do we learn from the FF3 I10n experience
  - What should we emulate?
  - What should we do different?
  - ...
- How much process (approval, release preparation) do we need?
- How can we improve localizability of TB3?
  - What are the major roadblocks that block the I10n quality and user experience (UX) in your language?
  - ...
